

Viva – real wood!

Wood flooring

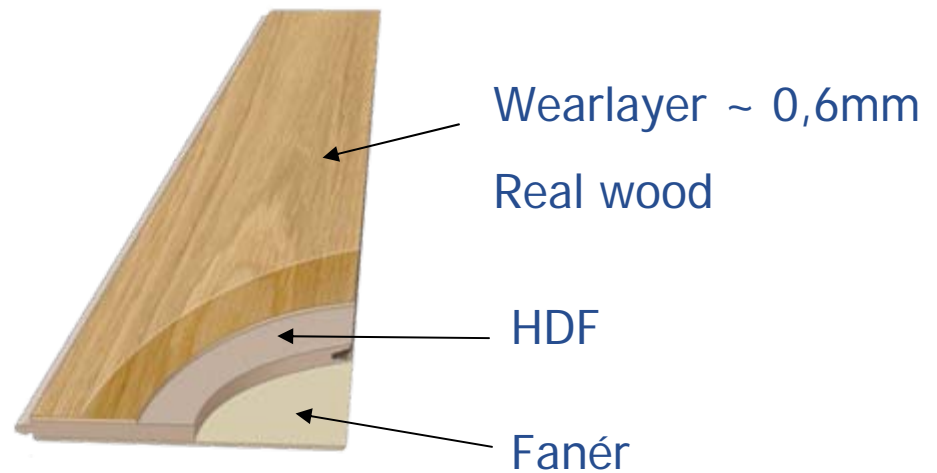

Viva – real wood!

Wood flooring

What is Viva?

- Viva is a thin veneer floor – 8,5mm
- Core: HDF
- Wearlayer: 0,6 mm real wood
- The same proven stable 3-layer principle as all Tarkett wood floors

Why Viva?

Vivas surface is treated with Proteco or Proteco Natura – the strongest laquer on the market*

- Proteco is almost twice as strong as most laquers on the market
- The wear and tear is on the laquer – not the floor
- Proteco Natura is the strongest matt laquer on the market – the look of oil but the advantages of laquer!

Thickness

- Thick enough to provide a good stability
- Only 8,5mm makes it the perfect floor for renovation. It is easily installed on top of the old floor

Hardness

- Viva is the hardest floor in the Tarkett range
- Can take a lot of wear and tear and therefore fits most rooms in a home

**According to the official Taber test method SIS 923509*

Why Viva?

Viva is a smart environmental choice!

- Output of Viva from f.i an oak is up to 3000sqm which is more than 4 times that of a 14mm floor.

Viva is easily installed without glue

- Ultraloc provides an installation without the need to glue down
- Quick and easy to install. Easy to remove – if you want to bring it along...

You can have your Viva in a number of ways

- 3-strip, 2-strip, plank or mini plank (with minibevel for an exclusive look)
- Laquer, matt laquer, brushed, stained
- Several wood species: Oak, Ash, Cherry, Beech, Walnut, Maple, Bamboo

Viva has an attractive price!

- Viva is a real wood floor with a natural warm feeling – at a price even lower than expensive laminate floors. Feel the difference!
